

PORTFOLIO WEBSITE

MY PORTFOLIO WEBSITE IS A DIGITAL SPACE SHOWCASING MY PERSONAL AND PROFESSIONAL PROJECTS THAT DEMONSTRATE MY PROFICIENCY IN USER EXPERIENCE DESIGN, ATTRACTING INTEREST FOR EMPLOYERS AND COLLEAGUES.

This website will contain any UX design projects I have started, whether it be prototypes, case studies, or research, and will be presented professionally. I have had experience with some projects pertaining to these areas of design and am currently working on more projects in school to add to this portfolio. As a student studying Information Science, I am creating this website to present not only my work, but also my individuality to recruiters and others in my field to help with networking and potential career opportunities. This portfolio website itself will also demonstrate my ability to properly design for an efficient user experience and an aesthetic digital environment.

About

I'm a Sophomore at Michigan State University studying Information Science, projected to graduate in December 2024. I currently have an Associates of General Studies, received from Macomb Community College under an academic concentration towards Psychology. I have experience with design concepts, and software such as Figma and Miro, with additional familiarity of the programming language Python. With this skill set, I'm working towards developing and expanding my portfolio to reflect my individuality and expertise as a designer.

- I enjoy:
- Music
 - Reading
 - Designing
 - Creating
 - Thinking

- I know:
- Python
 - Miro
 - Figma
 - Canva

- I am:
- A graduate
 - A designer
