PORTFOLIO WEBSITE

MY PORTFOLIO WEBSITE IS A DIGITAL SPACE SHOWCASING MY PERSONAL AND PROFESSIONAL PROJECTS THAT DEMONSTRATE MY PROFICIENCY IN USER EXPERIENCE DESIGN, ATTRACTING INTEREST FOR EMPLOYERS AND COLLEAGUES.

This website will contain any UX design projects I have started, whether it be prototypes, case studies, or research, and will be presented professionally. I have had experience with some projects pertaining to these areas of design and am currently working on more projects in school to add to this portfolio. As a student studying Information Science, I am creating this website to present not only my work, but also my individuality to recruiters and others in my field to help with networking and potential career opportunities. This portfolio website itself will also demonstrate my ability to properly design for an efficient user experience and an aesthetic digital environment.
